Professional Summary

Senior Developer with **8+ years of experience** designing and delivering **scalable, cloud-native microservices** using **Java (8, 17), Spring Boot, and Microservices event-driven architectures** across **IoT, Healthcare and Insurance domains**. Expertise in **Secure Rest API design, Resilience engineering** (Resilience4j, Redis), and **API Gateway patterns**, with strong ownership of **architecture decisions** and **end-to-end SDLC** in Agile environments.

Technical Proficiency

- Accomplished **Java Backend Developer** with **8.2 years** of professional experience in designing, developing, and deploying enterprise-grade applications across the complete Software Development Life Cycle (SDLC).
- Expertise in building scalable, secure, and high-performance **RESTful APIs using Core Java (8/17), Spring Framework, Spring Boot, Spring Data JPA, and Microservices Architecture**.
- Designed and implemented **Service Discovery** architecture using **Eureka Service Registry** to support scalable, resilient, and dynamically discoverable Microservices ecosystems.
- Implemented **API Gateway pattern** for centralized **Request Routing, Load balancing**, security enforcement, **authentication/authorization**, and efficient management of **downstream Microservices**.
- Hands-on experience in implementing **Resilience4j patterns** such as **Circuit Breaker and Retry** to improve system reliability and ensure fault-tolerant Microservices communication.
- Strong experience in designing **Event-Driven Architectures** using **Apache Kafka** for real-time messaging, asynchronous processing, and distributed data streaming.
- Successfully implemented **Choreography-based Microservices** communication pattern to enable loosely coupled asynchronous interactions among distributed services.
- Experienced in developing secure backend applications using **Spring Security and JWT-based authentication and authorization** mechanisms.
- Developed and maintained **well documented RESTful API** using **Swagger 3 (OpenAPI)**, improving API usability, and cross-team collaboration.
- Strong expertise in writing Unit and Integration Test Cases using **JUnit and Mockito** to ensure high code quality, maintainability, and application stability.

Professional Experience

- Senior Software Engineer** June 2023 – Present
🏢 Wipro Limited - Hyderabad, India
- Software Engineer** July 2021 – June 2023
🏢 Cognizant Technology Solution - Hyderabad, India
- Software Engineer** January 2020 – June 2021
🏢 Value Momentum - Hyderabad, India
- Software Engineer** December 2017 – December 2019
🏢 Ray Business Technologies - Hyderabad, India

Technical Skills

- Core Java (8/17)
- Spring, Spring Boot
- Spring Data JPA
- Spring Security JWT
- Microservices Architecture
- Resilience4j (Circuit Breaker, Retry)
- Redis
- Apache Kafka
- MySQL DB
- JUnit, Mockito
- Github and BitBucket
- Agile / Scrum

Projects Handled

Project: JCB India

Client: Joseph Cyril Bamford Excavators Ltd (**JCB**)

Tech Stack: Java (8,17), Spring Boot, Microservices, Kafka, Redis, Azure and MySQL

- JCB India is a construction and heavy equipment company. It manufactures machines used in construction, road building, agriculture, mining, and infrastructure projects.
- JCB manages: Sales dealerships, Spare parts distribution, Machine servicing and Customer support centers across India.

Project: OMMS Provider Enrollment

Client: OPTUM

Tech Stack: Java 8, Spring Boot, Microservices and MySQL

- It's a collaboration with the USA, Where in Hospitals, Clinics, Institute and Providers can get enroll in Application. Some of the important Modules are
- Some of the important Modules are **Provider, Member and (State Management Administrator) SMA.**

Project: Partner Portal

Client: Liberty General Insurance

Tech Stack: Java 8, Spring Boot, Microservices and MySQL

- Partner Portal is all about issuance of different insurances by different agents for the commercial purpose.
- The partner portal will be loaded with many more insurance types such as motor and health. In this some of the roles are Partner, Sales manager and Underwriter.

Project: OVH(One View HRM (Human Resource Management))

Client: Ray Business technologies

Tech Stack: Java 7, Spring, Hibernate and MySQL

- The main objective of this project is to provide information regarding company Employee's profiles and their performances during the appraisal process, leave process, Project Management, Recruitment Processing, Payroll management, Holiday calendar Support Management and various other employee management activities.
